

Ethnographic Museum of Macotera

Through different audiovisual and educational resources, of a simple and attractive set-up, this museum tries to expose that coexistence, that intuitive model of sustainability of our ancestors.

On the ground floor, the relationship of man with the landscape is shown, while in the basement, varied and rich original pieces of daily life and the productive world are exhibited, without forgetting the rites and manifestations of intangible heritage. An ancient traditional winery of enormous dimensions dominates the space, which it shares with other large-format objects such as the impressive Macoterano painted cart. Along with them, the visitor will enjoy the delicate pieces of clothing, children's furniture, pastoral art, sets of weights and measures or religious jewelry.
