

## Reservoir of Barrios de Luna

It has clear waters and a welcoming landscape which is formed of wide and varied forests of evergreen, deciduous and bushes. In the surroundings of the reservoir of the Barrios de Luna, the juniper groves of Mirantes and the forests of beech, birch and oak petiolate of Abeltas and Mayo de Luna are worthy of being mentioned

Due to this environment that leads to a growing recreational activity filled with activities such as the observation of the landscape, activities such as fishing, water sports, hunting, bathing or hiking in a natural place of singular beauty.
