

Church of San Juan Bautista or de San Juan de Baños

The basilica is the most important and representative manifestation of Spanish Visigothic art. It dates from 661 and it was founded by Recesvint, using the previous Roman remains.

The walls are built with large stone blocks without mortar. Four columns support the arches separating the naves. The sculpted decoration is relatively classic, traditional and austere, it includes eight Corinthian capitals. Above the main arch is a tombstone with the consecrating inscription of the king Recesvint.
