

Sanabria Lake environmental cruise

The hydrography research vessel at the Lake Sanabria International Biology Station studies the unexplored underwater world of the Iberian Peninsula's largest glacial lake, interpreting its geology, fauna, floral and archaeological remains thanks to the work of its biologist-divers.

The world's first wind and solar powered catamaran with a glass deck and a capacity for up to 80 passengers, is certified as generating zero emissions, zero liquid discharges, zero waste and zero decibels. The tours depart from the Cesta Llago jetty, close to Ribadelago.

Address

Lago de Sanabria. Ribadelago (Galende). Zamora.
