

Forest Interpretation Center

The Santa Cruz de Yanguas Information and Interpretation Center aims to disseminate and enhance "The Forest of Santa Cruz de Yanguas" for which it offers the visitor a review of its history, its landscape, its limits, as well as an analysis of the forest species that we can find there.

- **Space 1: HISTORICAL REFERENCE RECEIVER**

At the entrance to the Interpretation Center, there are the first explanatory panels that serve to contextualize "The Forest of Santa Cruz de Yanguas" within History. In this sense, the prehistoric era in which dinosaurs inhabited the Highlands is the key reference.

- **Space 2: MULTIMEDIA ROOM**

Currently, it is used to play an illustrative video of the mountains, forests and surroundings of Santa Cruz de Yanguas at different times of the year. A descriptive panel of geographical content is also added to this space, which includes references to the hiking routes in the area.

- **Space 3: ROOM WITH DESCRIPTIVE PANELS OF SPECIES AND BORDERING AREAS.**

In the last and largest space, seven descriptive panels are displayed in which you can see from a satellite image of Santa Cruz and its bordering territories, in which the orography of its forests can be perfectly appreciated.

WHEN TO VISIT IT?

Observations: Arrange a visit at www.museosvivos.com <http://museosvivos.com/centro-del-bosque-en-santa-cruz-de-yanguas-tierras-altas/>
