Located in the Cañon del Río Lobos Natural Park. Interesting route that runs along the Ucero River, in the section that goes from its source to the town of Ucero itself. Pass by the Casa del Parque del Cañon, the Ucero castle and a section of the Roman canal that supplied water to the ancient city of Uxama (El Burgo de Osma). If you dare to cross this small stretch of about 135 ms inside the canal, you would need a flashlight, although it would be advisable not to disturb the bats that might live there. The views offered by the castle surroundings are unbeatable.
