Route: From Muelle de Vega Terrón to Estación de La Fregeneda

Located in the Arribes del Duero Natural Park. The Camino de Hierro is a pedestrian route that runs along a section of railway line closed to traffic, which combines the grandeur of the most representative civil engineering of the 19th century with a privileged nature, since it is located in the heart of the Arribes del Duero natural park. Douro. The route begins along the side walks of the road and goes through a succession of tunnels and bridges that allow us to see the impressive cliffs and the bed of the Águeda River, which flows into the Duero, ending the itinerary at the only river dock in Castile and León.. Requires prior reservation.
