THE VOICED SPAIN

The day has come. The people of rural Spain, fed up and tired of the treatment they have received from the institutions and their politicians, have decided to take their tractors out of the threshing floors and their cattle out of their pastures to go to the city and surround the Congress of Deputies. In the famous building, there are only a few clueless politicians who, if they do not find a solution to all the problems of Empty Spain, will see their lives in danger.
