THE LITTLE PRINCE

On the 20th anniversary of its first production, Fabularia Teatro is producing a new version of The Little Prince.

Raúl Gómez and Trinidad Osorio rewrite the original work, creating their own, synthesizing its passages, characters and conflicts.

The main character, The Little Prince, is transformed into a "puppet" with simple features but with all the magic of **Saint-Exupèry** 's drawings, which places him in the same dimension as "The Rose", "The Fox", or "The Serpent", all of them puppets. The puppet technique connects the characters with each other, and these with spectators of all ages.

With this new version of The Little Prince, Fabularia Teatro recovers a "classic" of universal literature, in a contemporary version, rewritten by the authors Trinidad Osorio and Raúl Gómez, from Castilla y León.

Genre: Theatre. Style: Multidisciplinary. Duration: 60 min.

See more information about the work in attached files.

Show included in the programming of the Scenic Circuits of Castilla y León.
