

Museo vivo Valbusenda

Two hectares next to the winery make up the Ampelographic Garden - unique in Castile and Leon and one of the largest in Europe - which has over 250 varieties of grapes from all over the world.

Complete the Living Valbusenda Museum a unique plot, the Garden of Formations, dedicated exclusively to the study of the different planting systems. Unique vineyard formation garden where the visitor can discover the different systems of vine management that exist in the world and why it is used one depending on the growing areas.

In this way, Bodegas Valbusenda intends to disseminate the wine culture among its visitors, making available these natural spaces where everyone can enjoy themselves and knowing the differences between varieties, the different training systems and the surrounding ecological environment, using as a guide the pet of the "Osendo" for the little ones
