

Vía Verde de la Plata

This is the route that ran along the old railway line between Plasencia and Astorga. The conditioned section unites the environment of the city of Salamanca in Carbajosa de la Sagrada with Alba de Tormes.

The 20.2 km Greenway of La Plata, emerges from the left bank of the Tormes river, very close to the Natura 2000 Network Area: "Banks of the Tormes river and tributaries", to run northwest towards the town from Carbajosa de la Sagrada, in the alfoz of the Salamanca capital.

Address

Salamanca. Salamanca.
