

Bajo Boedo Ethnographic Museum

With the idea of remembering our most recent history between the years 1840 and 1950 in rural areas, Luis Gutiérrez Franco, a resident of Espinosa de Villagonzalo who emigrated to Madrid, has set up this museum as a cultural space.

A place where they have recovered objects already in disuse, but that were part of everyday life: farm implements, bicycles, sewing machines, toys, photographs ...

The explanations of Luis or his sister Concepción, will make us move to jobs and work that was carried out in the field, in the house, ... in short, to know how was the sustenance of the families and the basis of the domestic economy of the time.
