

Interpretation Center of the Watchtowers and Fortresses on the Douro border

Located in the Castle of the Cube of Langa de Duero.

On the ground floor, intended for reception, a counter and three information panels have been placed digitizing the history of the town (Segontia Lanka). From this floor you access the basement, where the castle's dungeon is recreated.

On the first floor, the architectural, functional, defensive and vital aspects of the fortresses are explained, centrally providing a model of the Gormaz fortress and three large informative panels in a circular layout, completing the life and passage through these lands of Rodrigo Díaz de Vivar, El Cid.

On the second floor, a central model has been installed with the communication and control system of the Bordecorex Valley and three panels in a circular layout showing, among other things, the Langa de Duero tower, collecting the results of the excavations made and explaining its historical evolution.

On the upper terrace, a view of the exterior will be offered by means of four panoramic panels inscribed on vinyl in which the most significant elements of the landscape are identified.

WHEN TO VISIT IT?

Opening hours

2 €

Observations: Arrange the visit by calling 616 480 114 ;
