

Puppet House

The Puppet House shows the puppet tradition as a theatrical art that is present in numerous cultures around the world.

It brings together one of the most complete existing collections in which you can see a great variety of puppets from the five continents: giant and tiny, ancient and modern, professional and toy.

To the puppets are added many other objects related to them: theaters, paper cutouts, books, posters ...

The Puppet House is directed by Miguel Ángel Ordóñez, creator of the company of the same name in 1979. They carry out the following activities:

- Guided tours for schoolchildren and groups
- Assembly and production of shows
- Construction of masks, giants and big heads
- Workshops for children, youth and adults
- Puppet Theater Library
