

## Cañada Real Soriana Occidental

It begins in Yanguas, in the Highlands of Soria, and crosses the Duero river through Almazán. From here begins a tour, already outside the lands of Castilla y León, from Guadalajara to Seville. In addition, the Cañada Real Soriana Oriental is one of the best preserved, with a diagonal path, from northwest to southeast, different from the typical meridian route of the Cañadas Reales. In the Sierra de las Cabrejas it intersects with the Galiana, in Soria. With the Cañada Real Segoviana it is done in the port of Somosierra and with the Leonesa Oriental in that of Guadarrama. It also approaches West Leonesa in the Venta del Hambre (Ávila), and that of La Plata in Los Santos, near Béjar (Salamanca).

### Address

---

Yanguas. Soria.
