

Los Cinco Caños

High-Imperial Roman building from the centuries I – II AC. It has a large floor, with apses covered by vaults and walls adorned with painted stucco.

The functionality of the building is unknown but it seems to be related to the water. All the left side was a big pond whose lining has disappeared today, so it could have been either a house with thermal baths or a large monumental fountain.

Historical Data

Architecture: Archaeology site

Construction: Old building

Historical Period: Roman
