

Way of the Pesquerias Reales

The route, created by Carlos III to have an easy access to privileged areas of fishing, is simple and pleasant. Therefore, it is recommended as a familiar route, being possible to go all together walking on the banks of the Eresma river.

The path can be traversed completely or only a stretch, since the journey passes through towns like Valsain as well as through the recreation areas of Los Asientos and Boca del Asno, both quiet places for a picnic.
