

Interpretation Center of the Nature of Arevalo

It is located in the House of the Council of the Plaza del Real, specifically in the old prison, which preserves cells, doors and other elements. It hosts a complete exhibition of dioramas that reproduce the main ecosystems of the region and the species that inhabit them.

A webcam located in the tower of the church of Sta. María records the stork nests in real time and is projected on a monitor in this space and also on the municipal website
