Church of San Lorenzo

Built upon the original Mozarabic structure. It has three apses, a portico and a five-storey brick tower.

The nave was built in the XII and the chevet in the following century. At the bottom, on the western façade, it is preserved a portal, the main, built in brick, with double horseshoe arch framed by alfiz, although it seems a Romanesque-Mudejar work.

Historical Data

Architecture: Religious architecture
