

## Castle of Torremormojón

The castle was rectangular, a moat and round cubes attached to the corners, and a three-storey tower of homage. Of the original tower, only a vaulted chamber with arches has been preserved.

The fortress was built between 1502 and 1512. The remains indicate that the building was a war structure. It stands on a hilltop overlooking a great area of Tierra de Campos.

Along with the remains of the castle, the "Estrella de Campos" viewpoint has been built, located on the top of an isolated hill very close to the town, one of the foothills of the Torozos mountains.
