

El Pozo de los Humos

Very near the Adeadávila reservoir is the town of Masueco, which belonged to the count of Ledesma. The area shares the impressive waterfall of Pozo de los Humos with Pereña de la Ribera. This is where the river Uces drops more than 40 metres, creating an impressive waterfall surrounded by ravines and wonderful vegetation.

The river Uces pours its waters into the Duero basin between the municipal limits of these two areas.

Address

Masueco. 37251 Salamanca.
