

Arribes del Duero environmental cruise

The Arribes del Duero Environmental Cruise travels through the spectacular vertical cliffs of the International Douro, on its border between Zamora (Spain) and Miranda do Douro (Portugal). During the journey, the technicians of the Biological Station interpret the ethnographic resources, fauna, flora and geology of the spectacular cuts in the park. After your return to the International Biological Station, it includes a tasting of generous Port wines, a visit to its Douro Valley Shop and facilities with otters and other species from the EBI's Animal Therapy Program.

Address

Badilla (Fariza). Zamora.
