

VSM Open Air Museum

The VSM Museum is made up of a dozen sculptures and shields made between 2011 and 2015 and aims to give a second life to objects that are no longer useful for the service for which they were created.

The two facets that this museum aims to cover are the exhibition of artistic sculptures that have functionality and didactic instruction to inform the visitor about current ways of life and our history and corners of the town of Vega de Santa María that are shown through art.

The other facet is the dissemination that is done through temporary exhibitions, contests and crafts to promote native art and communicate to the viewer that many activities can be done in our towns.
