

Los Argüellos

Los Argüellos is an example of a Cantabrian mountain ecosystem, in which the scant resources available have been put to wise use by the local population for many centuries, shaping a unique landscape.

Hiking is a great way of enjoying and conserving its natural and ethnographic values which are practically unexploited, and there is much to explore and discover. Valporquero Cave is a fine example of the underground formations that are typical of karst landforms.

Declared

Statement date: 6/29/2005

Category: Biosphere Reserve

Area: 33,260 ha.

Location: Norte de la Provincia de León, limitando con Asturias.

Population: 1.274 habitantes.

Region / Province biogeographical: Eurosiberiana / Atlántica Europea.

Municipalities in the province of León: Cármenes, Valdelugeros, Vegacervera

Route

Valporquero de Torío

Journey: Circular

Length: 6 km.
